Our Vision & Values: A leading organisation that collaborates & innovates

We are committed to **safety**

We work as one **team**

We act with **integrity**

We care about our **customers**

We **continuously improve**

Primary purpose of position

Responsible for providing a high level of technical expertise and support for the development, implementation, and maintenance of technology products ensuring customer and business needs are met.

The Technical Support team has a number of Technical Product specialists who share a range of responsibilities and competencies but who each specialise in certain areas, for example Property, EDRMS, Sharepoint Online. The specialisation may change over time as skills and competencies develop and requirements change.

Accountabilities

- Responsible for ensuring that Council's technology products and services are integrated, available, secure, robust, responsive and optimised in relation to current and emerging business needs.
- Manage the provision of technical product support services, including proactive issue identification, expert problem resolution, scheduling, management and reporting of planned and reactive releases in line with agreed service levels
- Provides thought leadership in terms of emerging trends and innovation in the product solutions space and make recommendations.
- Work collaboratively with customers to gather their business requirements and translate them into product specifications and solutions that meet their business needs.
- Own the product roadmap initiative design and delivery.
- Develop procedures for implementing and reporting on effective lifecycle management of products and environments, ensuring products are kept current, secure, available and well documented so that reactive and repetitive workload is minimised and the efficiency of products maximised.
- Ability to recover product availability within the Council's BCP and recovery priorities, through periodic testing, reporting and remediating of disaster recovery processes.
- Liaise with system supplier, log change requests and functional specifications, problem reports, prepare and conduct user acceptance testing ensuring agreed service levels are being met.

- Provide a high level of customer service to both internal and external customers, with a particular focus on continuous improvement and enhancing the customer experience.
- Lead Special Projects as required focused on a smooth transition from development to production
- Additional duties as required within the limits of the employee's skill, competence and training
