

SAFETY AT CBCITY

At CBCity, we are committed to safety at all levels and value your involvement in safety. It's important that we all have a positive attitude towards safety which will help us achieve the best possible safety outcomes in the workplace.

Everyone plays a part in ensuring a safe and healthy workplace. At CBCity, we encourage all team members to speak up about safety so we can continuously improve.

LEAD FOR LIFE

is our proactive safety decision making framework that continuously reminds us of the everyday elements for creating a safe workplace culture.

Look at the situation

Evaluate what you are doing and what could go wrong

Action to make it safer

Discuss so that people know

GET TO KNOW OUR SYSTEMS & INFORMATION

SAFETY MANAGEMENT SYSTEM

To maintain a safe workplace, everyone needs to understand their roles and responsibilities. We accomplish this through our Safety Management System (SMS), which consists of core, risk control, and administrative procedures. Your leader will ensure you do all the relevant training in these procedures.

WHS CONSULTATIONS

There are a number of formal and informal methods of exchanging information and discussing safety at CBCity. Council has seven (7) localised WHS Committees which meet to discuss safety items relating to the workgroup.

INCIDENT REPORTING

It is essential to report any incidents or near misses via our online safety system, SolvSafety, as it plays a crucial role in promoting safety and minimising the risk of accidents and injuries in the workplace. It also ensures a timely intervention to help the outcome.

WE SHOW OUR COMMITMENT TO SAFETY THROUGH:

Providing and maintaining safe work environments and systems of work

Delivering ongoing consultation and education on safety through the implementation of our Safety Strategy

Complying with legislation and guidelines and improving WHS that promotes awareness

Ensuring the health, safety and welfare of team members is not compromised

ADDITIONAL TRAINING AND RESOURCES WILL BE PROVIDED UPON COMMENCEMENT
